11 There are 30 children in a nursery school.
At least 1 adult is needed for every 8 children in the nursery.

(a) Work out the least number of adults needed in the nursery.

.....

(2)

2 more children join the nursery.

(b) Does this mean that more adults are needed in the nursery?
You must give a reason for your answer.

.....

(1)

(Total for Question 11 is 3 marks)

12 Emma has 45 rabbits.

30 of the rabbits are male.
8 of the female rabbits have short hair.
12 of the rabbits with long hair are male.

(a) Use the information to complete the two-way table.

45 - 30 = 15
30 - 12 = 18
15 - 8 = 7

	Male	Female	Total
Long hair	12	7	19
Short hair	18	8	26
Total	30	15	45

3 marks total
All nine entries correct

(3)

One of Emma's rabbits is chosen at random.

(b) Write down the probability that this rabbit is a female with short hair.

8 short-haired females out of 45 rabbits.

$\frac{8}{45}$

(1)

1 mark
Use the required cell over the total
