15 Tracey is going to choose a main course and a dessert in a cafe.
She can choose from 8 main courses and 7 desserts.

Tracey says that to work out the number of different ways of choosing a main course and a dessert you add 8 and 7

(a) Is Tracey correct?
You must give a reason for your answer.

.....

.....

(1)

12 teams play in a competition.
Each team plays each other team exactly once.

(b) Work out the total number of games played.

.....

(2)

(Total for Question 15 is 3 marks)

16 Solve $(x - 2)^2 = 3$

Give your solutions correct to 3 significant figures.

Taking square roots gives both signs:

$x - 2 = \pm\sqrt{3}$

1 mark
Take the positive and negative roots

$x = 2 \pm \sqrt{3}$

$x = 0.267949...$ or $3.732050...$

0.268 or 3.73

1 mark
Both solutions to 3 significant figures

(Total for Question 16 is 2 marks)
