

3 The table shows some information about the dress sizes of 25 women.

| Dress size | Number of women |
|------------|-----------------|
| 8          | 2               |
| 10         | 9               |
| 12         | 8               |
| 14         | 6               |

(a) Find the median dress size.

(1)

3 of the 25 women have a shoe size of 7

Zoe says that if you choose at random one of the 25 women, the probability that she has either a shoe size of 7 or a dress size of 14 is  $\frac{9}{25}$  because

$$\frac{3}{25} + \frac{6}{25} = \frac{9}{25}$$

(b) Is Zoe correct?  
You must give a reason for your answer.

(1)
