Question	Answer	Mark	Mark scheme		Additional guidance
29	No (supported)	P1	for finding the area of 3 or more faces of the cuboid **and** adding eg $(6 \times 8) + (8 \times 18) + (6 \times 18)$ … or "48" + "144" + "108" … (= 300)		Could be an addition of *any* three faces eg 48 + 48 + 144 etc.
		P1	complete process to find surface area of cuboid, eg $6 \times 8 \times 2 + 6 \times 18 \times 2 + 8 \times 18 \times 2$ (= 600)		
		P1	for process to find side length of cube, eg [surface area] ÷ 6 **and** square rooting (= 10)	for a process to find the volume of the cuboid $6 \times 8 \times 18$ (= 864) **and** cube rooting (= 9.52…) to find a side length	[surface area] must come from the addition of at least three attempts at area, but not from volume.
		P1	(dep on previous P1) for processes to find volume of cube **and** volume of cuboid, eg $[\text{side length}]^3$ (= 1000) **and** $6 \times 8 \times 18$ (= 864)	(dep on previous P1) for process to find surface area of cube, eg. ("9.52…")$^2 \times 6$ (= 544.28…)	
		A1	No with 1000 **and** 864 **OR** No with 600 **and** 544(.28…)
