

Question	Answer	Mark	Mark scheme	Additional guidance
19	4.7 (supported)	M1	for one correct bound from, 119.5, 120.5, 25.55, 25.65	for m accept $120.4\dot{9}$ or 120.499... for f accept $25.64\dot{9}$ or 25.499...
		M1	for a correct method to find one bound of T , eg [UB of T] = [UB of m] $\div$ [LB of f] or [LB of T] = [UB of m] $\div$ [UB of f]	$120 < [\text{UB of } m] \leq 120.5$ $119.5 \leq [\text{LB of } m] < 120$ $25.6 < [\text{UB of } f] \leq 25.65$ $25.55 \leq [\text{LB of } f] < 25.6$
		A1	for 4.716.. and 4.658.. from correct working	Accept bounds rounded or truncated to at least 4 sf
		C1	for 4.7 from 4.716.. and 4.658.. with a supportive reason eg because both values round to 4.7 correct to one decimal place
