

Question	Answer	Mark	Mark scheme	Additional guidance
20	10.7	P1 P1 P1 P1	for the start of a process to find the radius, eg. $\sin 25 = \frac{6}{OC}$ for a complete process to find the radius, eg. $6 \div \sin 25 (= 14.197..)$ for process to find area of triangle OAC, eg. $0.5 \times "14.197.."^2 \times \sin 50$ or $6 \times 6 \div \tan 25 (= 77.20..)$ for process to find area of sector $OABC$,	For process marks accept figures rounded or truncated to one decimal place.
		A1	eg. $\frac{50}{360} \times \pi \times (14.197..)^2 (= 87.947..)$ for answer in the range 10.6 to 10.9
