Paper: 1MA1/3H				
Question	**Answer**	**Mark**	**Mark scheme**	**Additional guidance**
14	60 (supported)	M1	for angle *DBF*, eg 180 – 100 (= 80)	Angles may be shown on the diagram or in working
		M1	for angle *BFD*, eg 180 – "80" – 40 (= 60) or for angle *CBF* = 40	
		A1	for angle *ABD* = 60	
		C1	(dep M2) for at least 2 reasons from Opposite angles of a cyclic quadrilateral add up to 180 Angles in a triangle add up to 180 Alternate segment theorem **OR** Opposite angles of a cyclic quadrilateral add up to 180 Alternate segment theorem Angles on a straight line add up to 180	Underlined words need to be shown; reasons need to be linked to their method
