

2 All the marks on the mark scheme are designed to be awarded; mark schemes should be applied positively. Examiners should also be prepared to award zero marks if the candidate’s response is not worthy of credit according to the mark scheme. If there is a wrong answer (or no answer) indicated on the answer line always check the working in the body of the script (and on any diagrams), and award any marks appropriate from the mark scheme.

Questions where working is not required: In general, the correct answer should be given full marks.
Questions that specifically require working: In general, candidates who do not show working on this type of question will get no marks – full details will be given in the mark scheme for each individual question.

B unconditional accuracy mark (no method needed)

19	Shape drawn	B2	for shape with vertices at $(4, -3)$, $(5, -4)$, $(5, -5)$, $(4, -5)$	Shape does not have to be shaded. Allow some tolerance on vertices as long as they are nearest to the desired points.
		(B1	for rotation of 180° about wrong centre)	This is shown by the orientation of the shape.
