Question	Answer	Mark	Mark scheme	Additional guidance
12 (a)	$w = (\pm)\sqrt{4(u - 2t)}$	M1	for a correct first step, eg $u - 2t = \frac{w^2}{4}$ **or** $4u^2 = w^2 + 8t$	
		M1	for isolating in terms of w, eg $4(u - 2t) = w^2$ or $4u - 8t = w^2$	
		A1	for $w = (\pm)\sqrt{4(u - 2t)}$ oe	Accept $w = \sqrt{4(u - 2t)}$ oe
(b)	$3(y + 7)(y - 7)$	M1	for partial factorisation, eg $3(y^2 - 49)$ oe **or** $(3y + 21)(y - 7)$ oe **or** $(y + 7)(3y - 21)$ oe	
		A1	for $3(y + 7)(y - 7)$ oe
