Question	Answer	Mark	Mark scheme	Additional guidance
13	86.5	P1	for correct substitution into the sine rule to find PR, eg $\frac{11}{\sin 38} = \frac{PR}{\sin 112}$ oe	
		P1	for full process to find PR, eg $\frac{11 \sin 112}{\sin 38}$ (=16.565…)	P2 can be awarded for PR = 16.565…or 16.6
		P1	for correct substitution into the cosine rule to find angle PSR, eg "16.565…^{2}" = $8^2 + 15^2 - 2 \times 8 \times 15 \times \cos PSR$ oe	
		P1	for full process to find PSR, eg $\cos PSR = (8^2 + 15^2 - \text{"16.565…}^2\text{"}) \div (2 \times 8 \times 15)$ (=0.0607…) oe	
		A1	for answer in range 86.5 to 86.8
