Question	Answer	Mark	Mark scheme	Additional guidance
15 (a)	2.6 to 3.2	B1	for drawing a suitable tangent at $t = 10$	Working: $28 \div 10 = 2.8$ No tangent scores 0 marks
		M1	for a full method to use the tangent to find the gradient, eg $28 \div 10$	This mark can be awarded if the tangent is drawn at $t \neq 10$ Working may be seen on the diagram
		A1	answer in the range 2.6 to 3.2	ft their acceptable tangent
(b)	450	M1	for splitting the area into strips and correct process to find the area of one strip, eg $\frac{5 \times 27}{2}$ (=67.5) **or** $\frac{(27 + 36)}{2} \times 5$ (=157.5) **or** $\frac{(36 + 54)}{2} \times 5$ (=225)	
		M1	for complete process using at least 3 strips to find the area under the curve, eg "67.5" + "157.5" + "225" (=450)	Allow one error in the reading of speed values
		A1	for answer in the range 445 to 455 from correct working using at least 3 strips
