Question	Answer	Mark	Mark scheme	Additional guidance
2 (a)	$2 \times 2 \times 2 \times 19$	M1	for a complete method to find prime factors, could be shown on a factor tree, with no more than one arithmetic error **or** for 2, 2, 2, 19	Condone the use of 1
		A1	for $2 \times 2 \times 2 \times 19$ oe	Accept $2^3 \times 19$
(b)	8	M1	for listing factors of both 96 and 152, at least 4 correct for each (with no more than 1 incorrect in each list, could be in factor pairs **OR** for the prime factors of both 96 (2, 2, 2, 2, 2, 3) and 152 (may be seen in (a)), may be seen in factor trees	1, 2, 3, 4, 6, 8, 12, 16, 24, 32, 48, 96 1, 2, 4, 8, 19, 38, 76, 152 $96 = 2 \times 2 \times 2 \times 2 \times 2 \times 3$ or $2^5 \times 3$ If factor tree in (a) is incorrect ft this factor tree in part (b) for M1 only
		A1	8 or $2 \times 2 \times 2$ oe	2, 2, 2 is not enough, must be a product
