Question	Answer	Mark	Mark scheme	Additional guidance
19	65	M1	for start to method, eg angle *EFD* = 30 or for angle *ADC* = 30 or for angle *DFB* = 180 – 30 (= 150)	Angles may be shown on the diagram
		M1	for complete method, eg angle *DEF* = 180 – 85 – 30 (= 65)	
		C2	for angle *ACD* = 65 and full reasons for their method from eg Vertically opposite angles are equal Angles in a triangle add to 180º Opposite angles in a parallelogram are equal Corresponding angles are equal Allied angles/co-interior angles add up to 180 Alternate angles are equal Angles on a straight line add up to 180	Underlined words need to be shown; reasons need to be linked to their method; any reasons not linked do not credit
		(C1	(dep M1) for one reason correctly used and stated)
