Question	Working	Answer	Mark	Notes
16 (a)		40	P1	for the start of a process to find the number of boxes that will fit along one edge, eg. 240 ÷ 40 (= 6) or 150 ÷ 30 (= 5) or 140 ÷ 35 (= 4) or 240 ÷ 30 (= 8) or 240 ÷ 35 (= 6.85… ie 6 boxes), etc. or for a process to find a volume, eg. 40 × 30 × 35 (= 42000) or 0.4 × 0.3 × 0.35 (= 0.042) or 240 × 150 × 140 (= 5040000) or 2.4 × 1.5 × 1.4 (= 5.04) NB: condone incorrect or no conversion between m and cm
			P1	for a complete process to find the maximum number of boxes, eg. "6" × "5" × "4" (= 120) or "5040000" ÷ "42000" (= 120) or "5.04" ÷ "0.042" (= 120)
			P1	(dep on P1) for (their number of boxes) ÷ 3, eg. 120 ÷ 3 (= 40)
			A1	cao
(b)		explanation	C1	for explaining that it could take more time or it could take less time **with** an appropriate reason, eg. "less space means less number of boxes which will take less time" or "it will take more time since a different arrangement would be required"
