3 Hannah is planning a day trip for 195 students.

She asks a sample of 30 students where they want to go.
Each student chooses one place.

The table shows information about her results.

Place	Number of students
Theme Park	10
Theatre	5
Sports Centre	8
Seaside	7

(i) Work out how many of the 195 students you think will want to go to the Theme Park.

Sample proportion = 10/30 = 1/3

1 mark
Use the sample proportion.

Estimate = 195 × 1/3 = 65 students

1 mark
65 students.

65

(2)

(ii) State any assumption you made **and** explain how this may affect your answer.

1 mark
State and explain the assumption.

Assume the sample represents all 195 students.

If it is biased, the estimate may be inaccurate.

(1)

(Total for Question 3 is 3 marks)
