20 In a box, there are only blue sweets, yellow sweets, green sweets and red sweets.
Joan is going to take at random a sweet from the box.

The table shows the probabilities that Joan will take a yellow sweet or will take a red sweet.

Colour	blue	yellow	green	red
Probability		0.3		0.1

The number of green sweets in the box is 3 times the number of blue sweets in the box.

There are 18 yellow sweets in the box.

Work out the number of green sweets in the box.

(Total for Question 20 is 4 marks)
