14	(a)		46 to 50	P1	for start to process e.g. evidence of using volume, e.g. $1490 \div \frac{4}{3}\pi r^3$ oe or use of estimates
				P1	complete process , e.g. number = $\frac{3\times1500}{4\times3\times2^3}$
				A1	arrives at estimate, e.g. 46 to 50
	(b)		would be less	C1	e.g. most divisors have been made smaller
