19		shows result	C1	shows expansion of the squares of any three consecutive numbers shown algebraically, e.g. $(4n^2 + 4n + 1)$ or $(4n^2 + 12n + 9)$ or $(4n^2 + 20n + 25)$
			C1	simplifies , e.g. $12n^2 + 36n + 35$
			C1	arrives at $12(n^2 + 3n + 2) + 11$ (oe) and concludes result
