9 The densities of three metal alloys, A, B and C, are in the ratio

$$13 : 15 : 21$$

$1\,m^3$ of alloy B has a mass of 8600 kg.

Work out the difference between the mass of $5\,m^3$ of alloy A and $3\,m^3$ of alloy C.
Give your answer correct to 3 significant figures.

..... kg

(Total for Question 9 is 5 marks)
