

- 2

All the marks on the mark scheme are designed to be awarded; mark schemes should be applied positively. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme. If there is a wrong answer (or no answer) indicated on the answer line always check the working in the body of the script (and on any diagrams), and award any marks appropriate from the mark scheme.

Questions where working is not required: In general, the correct answer should be given full marks.

Questions that specifically require working: In general, candidates who do not show working on this type of question will get no marks – full details will be given in the mark scheme for each individual question.
- 3

Crossed out work

This should be marked **unless** the candidate has replaced it with an alternative response.
- 4

Choice of method

If there is a choice of methods shown, mark the method that leads to the answer given on the answer line.

If no answer appears on the answer line, mark both methods **then award the lower number of marks.**
- 5

Incorrect method

If it is clear from the working that the “correct” answer has been obtained from incorrect working, award 0 marks. Send the response to review for your Team Leader to check
- 7

Ignoring subsequent work

It is appropriate to ignore subsequent work when the additional work does not change the answer in a way that is inappropriate for the question or its context. (eg. an incorrectly cancelled fraction when the unsimplified fraction would gain full marks).

It is not appropriate to ignore subsequent work when the additional work essentially makes the answer incorrect (eg. incorrect algebraic simplification).

B	unconditional accuracy mark (no method needed)
oe	or equivalent
cao	correct answer only

Paper: 1MA1/1F				
Question	Answer	Mark	Mark scheme	Additional guidance
1	0.02, 0.152, 0.2, 0.37, 0.4	B1	for correct order	Accept reverse order
2	60	B1	cao	
3	5	B1	cao	
4	8000	B1	cao
