18 The pie charts show information about the favourite animal of each student at school **A** and of each student at school **B**.

School **A**

School **B**

There are 480 students at school **A**.

There are 760 students at school **B**.

Henry says,

"The same number of students at each school have tigers as their favourite animal."

Is Henry correct?
You must show how you get your answer.

School A: 2x + 60 = 360, so x = 150°

Tigers A: 150/360 × 480 = 200

School B: tigers = 360 – 160 – 110 = 90°

Tigers B: 90/360 × 760 = 190

No. School A has 10 more tiger votes.

4 marks total
Find A tiger angle
200 at school A
190 at school B
No: difference 10

(Total for Question 18 is 4 marks)
