Question	Answer	Mark	Mark scheme	Additional guidance
19 (a)	Inequality shown	B2	for fully correct solution with all three aspects with no ambiguity Aspect 1: circle at 4 Aspect 2: circle not shaded Aspect 3: arrow pointing left or line extending beyond −5, starting from their circle	Circling the number 4 alone scores B0 Aspect 1 and Aspect 2 must relate to the same circle.
		(B1	for any two aspects)	
(b)	4,5,6,7	B2	for all four numbers in any order	
		(B1	for 2 or 3 correct values with no errors **or** 4 correct values with one extra)	
(c)	$x \geq 6$	M1	for a correct intention to subtract 5 from both sides **or** a correct intention to subtract x from both sides	Can work with an equation for both M marks
		M1	for a full method to solve the inequality **or** showing a critical value of 6	Award 2 marks for an answer of x ? 6 where ? is an = or any incorrect inequality symbol, or for an answer shown as just 6.
		A1	cao
