Question	Answer	Mark	Mark scheme	Additional guidance
15	5 : 9	P1	for associating algebraic expressions with the correct ratios, eg $x - 6 : y - 6 = 1 : 2$ **or** $x - 6 - 8 : y - 6 - 8 = 2 : 5$	
		P1	for $\frac{x-6}{y-6}=\frac{1}{2}$ **or** $\frac{x-14}{y-14}=\frac{2}{5}$ oe **or** $2(x - 6) = y - 6$ **or** $5(x - 14) = 2(y - 14)$ oe	Award for one of the two simultaneous equations eg $2x - y = 6$, $5x - 2y = 42$ oe
		P1	for a complete method shown to find x **or** y **or** for combining the simultaneous equations eg $5x - 2y = 14x - 7y$	Award for a simultaneous equation method to eliminate one variable leading to either $x = 30$ **or** $y = 54$
		P1	for a complete method shown to find x **and** y or two values for x and y that are in the ratio 5 : 9 or an unsimplified ratio 5 : 9 (eg 30 : 54) or an answer of 9 : 5 **or** for a complete method leading to $9x = 5y$ oe	Award for a simultaneous equation method to eliminate both variables leading to $x = 30$ **and** $y = 54$
