16 The diagram shows sector $OACB$ of a circle with centre O and radius 12 cm.

Reflex angle $AOB = 210°$

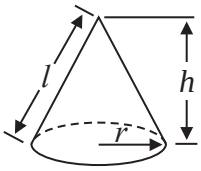

The diagram also shows a hollow cone with vertex O.
The curved surface of the cone is formed by joining OA to OB.
Arc ACB forms the circumference of the base of the cone.

Curved surface area of cone = πrl

Volume of cone = $\frac{1}{3}\pi r^2 h$

Calculate the volume of the cone.
Give your answer correct to 3 significant figures.

..... cm^3

(Total for Question 16 is 4 marks)
