16 The diagram shows sector *OACB* of a circle with centre *O* and radius 12 cm.

Reflex angle *AOB* = 210°

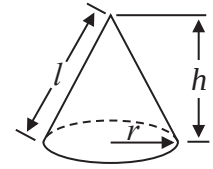

The diagram also shows a hollow cone with vertex *O*.
The curved surface of the cone is formed by joining *OA* to *OB*.
Arc *ACB* forms the circumference of the base of the cone.

Curved surface area of cone = πrl

Volume of cone = $\frac{1}{3}\pi r^2 h$

Calculate the volume of the cone.
Give your answer correct to 3 significant figures.

..... cm^3

(Total for Question 16 is 4 marks)
