

Question	Answer	Mark	Mark scheme	Additional guidance
22	79.76	P1 P1 P1 A1	process to find number of gallons eg $560 \div 34.5$ (=16.23...) OR finding the miles per litre eg $34.5 \div 4.55$ (=7.582...) process to convert from gallons to litres eg “16.23” $\times 4.55$ (=73.855....) OR to work out the cost per gallon eg 4.55×1.08 (=4.914) OR finding the number of litres eg $560 \div \text{“7.582....”}$ (=73.859...) (dep P2) for a complete process to work out the cost using the operations $(560 \div 34.5) \times 4.55 \times 1.08$ eg “73.855...” $\times 1.08$ (=79.763...) or “4.914” $\times$ “16.23...” (=79.763...) or “73.859...” $\times 1.08$ (=79.763....) for 79.69 to 79.79	For P marks allow use of truncated/rounded values To 2 dp but accept 79.7
