

18 Here is a graph of $y = \sin x^\circ$ for $0 \leq x \leq 360$

(a) Using this graph, find estimates of all **four** solutions of

$$\sin x^\circ = 0.6 \quad \text{for } 0 \leq x \leq 720$$

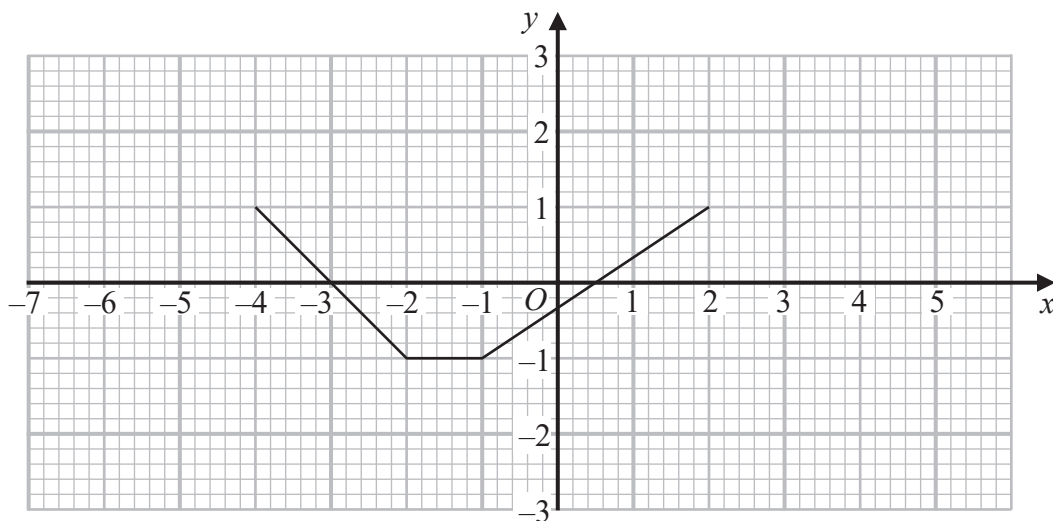

(2)

The graph of $y = \sin x^\circ$ is reflected in the x -axis.

(b) Write down an equation of the reflected graph.

(1)

Here is a graph of $y = f(x)$

(c) On the grid, draw the graph of $y = f(x - 2)$

(1)

(Total for Question 18 is 4 marks)
