

Question	Answer	Mark	Mark scheme	Additional guidance
15	40	M1	for angle $OAE = 90$ or angle $OCE = 90$, may be marked on the diagram	Angle could be shown by a right-angle symbol
		M1	for using angle at centre is twice the angle at the circumference, eg reflex angle $AOC = 2 \times 110 (= 220)$ OR for using opposite angles of a cyclic quadrilateral, eg angle $ADC = 180 - 110 (= 70)$	Correct method can be implied from angles on the diagram if no ambiguity or contradiction. Reasons need not be given.
		M1	for a complete method eg $360 - 90 - 90 - (360 - \text{“}220\text{”})$ or $360 - 90 - 90 - (2 \times \text{“}70\text{”})$	
		A1	cao
