

21 $f(x) = \frac{4}{x+3}$

$$g(x) = 3x + 1$$

(a) Find $f^{-1}(x)$

.....
(2)

Given that $a > 0$

(b) find the set of values of a for which $gf(2a) < a$

.....
(5)

(Total for Question 21 is 7 marks)
