

6	Yes, supported by correct figures	P1 for a process to find the number of sweets Tina gives to Andy, eg $14 \div 7 \times 3 (= 6)$ or for a process to work with fractions of the total to find fraction given to Andy, eg $\frac{14}{21} \times \frac{3}{7} \left(= \frac{2}{7} \right)$ or for dividing a given number (eg 441) in the ratio 1 : 6 : 14 (= 21 : 126 : 294) P1 for a process to find number for Andy and Tina after first exchange, eg A = 1 + “6” (=7) and T = 14 – “6” (=8) or for a process to find the number of sweets Tina gives to Luke eg $(14 - "6") \times \frac{12.5}{100} (= 1)$ or for a process to work with fractions of the total to find fraction given to Luke, eg for $\frac{(14 - "6")}{21} \times \frac{12.5}{100}$ or process to work out the number of sweets given to Andy and Luke for their total, eg “294” $\div 7 \times 3 (= 126)$ and $("294" - "126") \times \frac{12.5}{100} (= 21)$ P1 for a process to find the final amounts or final shares for at least two of Andy, Luke and Tina eg two of $1 + "6" (= 7)$, $6 + "1" (= 7)$, $14 - "6" - "1" (= 7)$ or $\frac{1}{21} + \frac{"2"}{7} \left(= \frac{7}{21} \right)$, $\frac{6}{21} + \frac{"1"}{21} \left(= \frac{7}{21} \right)$, $\frac{14}{21} - \frac{"2"}{7} - \frac{"1"}{21} \left(= \frac{7}{21} \right)$ or “21” + “126” (= 147) , “126” + “21” (= 147) , “294” – “126” – “21” (= 147) C1 Yes, supported by full working and accurate figures for Andy, Luke and Tina	May work with an equivalent ratio, eg 21 : 126 : 294 and do $294 \div 7 \times 3 (= 126)$ as a first step May work in multiples of x for all marks Accurate figures with no supportive working scores 0
