**26** The equation of the line $L_1$ is $y = 3x - 2$
The equation of the line $L_2$ is $3y - 9x + 5 = 0$

Show that these two lines are parallel.

$L_1$ has gradient 3.

$$3y - 9x + 5 = 0$$

(+9x −5) (+9x −5)

$$3y = 9x - 5$$

(÷3) (÷3)

$$y = 3x - \frac{5}{3}$$

**1 mark**
Rearrange $L_2$

**1 mark**
Equal gradients shown and compared

Both gradients are 3 and the intercepts differ, so the two lines are parallel.

**(Total for Question 26 is 2 marks)**
