11 Jeff is choosing a shrub and a rose tree for his garden.
At the garden centre there are 17 different types of shrubs and some rose trees.

Jeff says,

"There are 215 different ways to choose one shrub and one rose tree."

Could Jeff be correct?
You must show how you get your answer.

(Total for Question 11 is 2 marks)

12 The points A, B, C and D lie in order on a straight line.

$$AB : BD = 1 : 5$$
$$AC : CD = 7 : 11$$

Work out $AB : BC : CD$

Make the whole length AD equal in both ratios.

1 + 5 = 6 parts; 7 + 11 = 18 parts.

Multiply 1 : 5 by 3 to give 3 : 15.

1 mark
Use the same whole length of 18 parts

AB	BD
3	15

AC	CD
7	11

AB	BC	CD
3	4	11

AB = 3

AC = 7

BC = 7 − 3 = 4

CD = 11

1 mark
Subtract AB from AC

1 mark
AB : BC : CD = 3 : 4 : 11

3 : 4 : 11
