19 This diagram shows two squares.

Work out the area of the square shown shaded in the diagram.

Outer square side = 3 + 5 = 8 cm; area = 8^2 = 64 cm^2.

Four corner triangles: 4 × (½ × 3 × 5) = 30 cm^2.

Shaded square area = 64 – 30 = 34 cm^2.

4 marks total
Outer area 64
Corner areas 30
Shaded area 34
cm^2

(Total for Question 19 is 4 marks)
