22 Natalie makes potato cakes in a restaurant.

She mixes potato, cheese and onion so that

weight of potato : weight of cheese : weight of onion = 9 : 2 : 1

Natalie needs to make 6000 g of potato cakes.

Cheese costs £2.25 for 175 g.

Work out the cost of the cheese needed to make 6000 g of potato cakes.

Total parts = 9 + 2 + 1 = 12.

Cheese needed = 6000 × 2/12 = 1000 g.

Cost = 1000/175 × £2.25 = £12.857...

So £12.86 to the nearest penny.

4 marks total
12 parts; 1000 g
1000/175 packs
Multiply by £2.25
£12.86

£.....

(Total for Question 22 is 4 marks)
