13 A pattern is made from four identical rectangles.
The sides of the rectangles are parallel to the axes.

Point A has coordinates (3, 4)
Point B has coordinates (11, 20)
Point C is marked on the diagram.

Work out the coordinates of C.
You must show all your working.

Let long side = b and short side = a.

Across B–A: 2b – a = 8

Vertically B–A: 2b + a = 16

Add: 4b = 24, so b = 6 and a = 4

C = (3 + b, 4 + a) = (9, 8)

1 mark
horizontal equation

1 mark
vertical equation

1 mark
solve b=6, a=4

1 mark
locate C from A

1 mark
C=(9,8)

(9, 8)

(Total for Question 13 is 5 marks)
