9 On Monday, 12 people took 5 hours to clean a number of cars.
On Tuesday, 15 people cleaned the same number of cars.

Assuming that all the people worked at the same rate,

(a) work out how many hours the 15 people took to clean the cars.

Total work = 12 × 5 = 60 person-hours

Time for 15 people = 60 / 15 = 4 hours

4 hours

1 mark
12 × 5 ÷ 15

1 mark
4 hours

(2)

The assumption is wrong.

(b) How might this affect the time taken for the 15 people to clean the cars?

If the 15 people work slower, it could take longer.

1 mark
different work rate alters time

(1)

(Total for Question 9 is 3 marks)
