

14	shown	M1	for method to find angle ADC , eg $180 - 75 (= 105)$	Must be clear link to angle ADC , may be marked on diagram
		M1	for angle $BCD = 50$	
		M1	for method to find angle ABC , eg $360 - 100 - 50 - "105"$	Must be clear method/explanation shown. Angle marked on diagram is not sufficient.
		C1	(dep M3) for angles ADC , BCD and ABC correct and at least 2 appropriate reasons, eg vertically <u>opposite angles</u> are equal or <u>vertically opposite angles</u> are equal , <u>angles</u> on a straight <u>line</u> add to <u>180°</u> , <u>angles</u> in a <u>quadrilateral/kite</u> add up to <u>360°</u> ; <u>angles</u> at a <u>point</u> add up to 360°	Underlined words need to be shown; reasons need to be linked to their method
