

Paper: 1MA1/2H				
Question	Answer	Mark	Mark scheme	Additional guidance
20	160 (supported)	B1	stating bound of 10.85 or 10.95	Accept 10.94 $\dot{9}$ or 10.9499... for 10.95
		M1	using both UB and LB to work out value of d eg [UB of c] ³ $\div$ 8 and [LB of c] ³ $\div$ 8 or gives a bound of 159.66... from correct working or gives a bound of 164.11... from correct working	10.9 < UB $\leq$ 10.98 10.85 $\leq$ LB < 10.9
		A1	for 159.66... and 164.11... from correct working	Accept bounds rounded or truncated to at least 4 sig fig
		C1	for 160 from 159.66... and 164.11... with a supporting reason eg “since both UB and LB round to 160”
