Original wording

The alternative conversion is printed as 18/30 - 25/30.

Correction / interpretation

Use 13/5 - 11/6 = 78/30 - 55/30 = 23/30. The official final answer and the first improper-fraction example are correct; both numerators in the alternative denominator-30 example are misprinted.

Reason

Multiplying 13/5 by 6/6 gives 78/30, and multiplying 11/6 by 5/5 gives 55/30. The original embedded Word equation preview also contains 18 and 25, so this is a source error, not a PDF conversion change.
