11 Daisy thinks of a whole number.
She multiplies the number by 3
Daisy's answer is 34

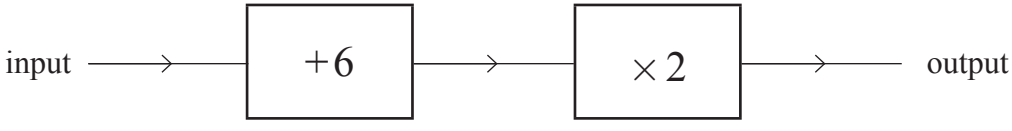

(a) Explain how you know Daisy's answer is wrong.

.....

.....

(1)

Here is a number machine.

Abbie says that when the output is 36 the input is 60

Here is her working.

$$36 - 6 = 30$$
$$30 \times 2 = 60$$

Abbie is wrong.

(b) Explain what she has done wrong.

.....

.....

(2)

(Total for Question 11 is 3 marks)
