4 $\mathbf{a} = \begin{pmatrix} 1 \\ 4 \end{pmatrix}$ and $\mathbf{b} = \begin{pmatrix} 3 \\ 2 \end{pmatrix}$

(a) Write down as a column vector

(i) $\mathbf{a} + \mathbf{b}$

.....

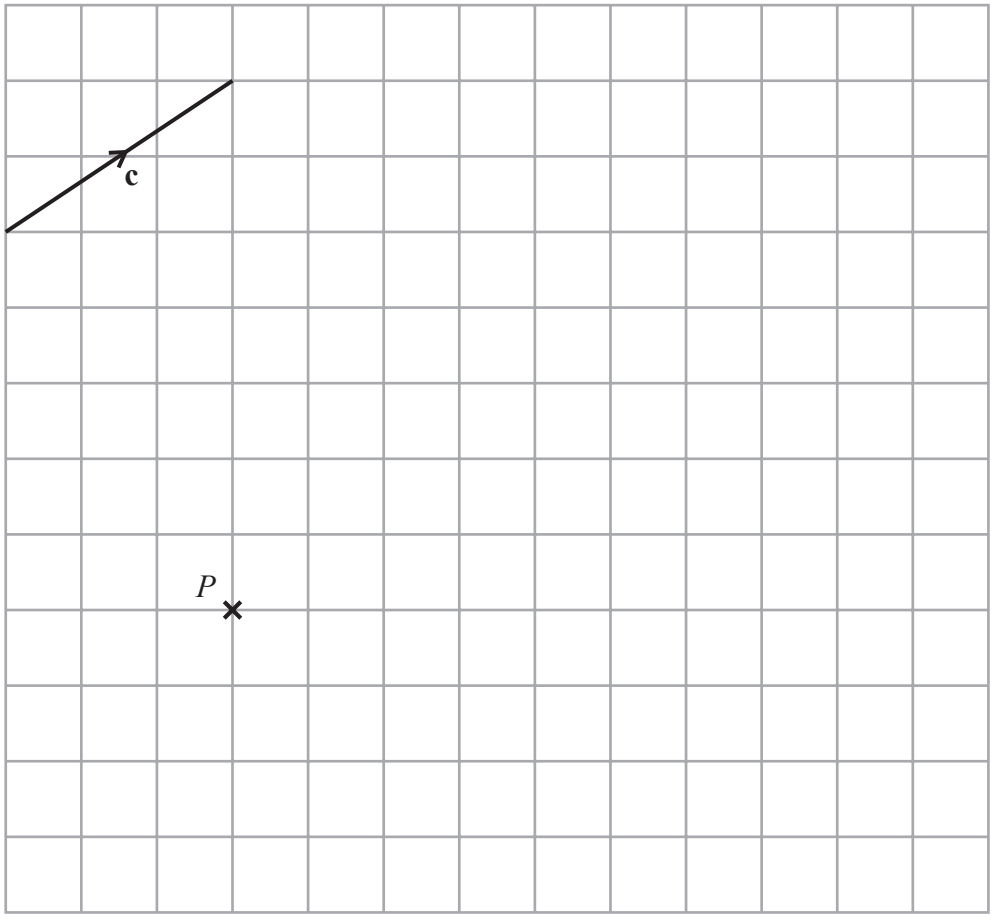

(1)

(ii) $2\mathbf{a} + 3\mathbf{b}$

.....

(2)

The vector **c** is drawn on the grid.

(b) From the point P, draw the vector $3\mathbf{c}$

(1)

(Total for Question 4 is 4 marks)
