

Paper: 1MA1/2H				
Question	Working	Answer	Mark	Notes
2		Yes (supported)	P1	for process to work out the total number of children, e.g. $117 \times 4 (= 468)$
			P1	(dep P1) for process to work out total number of adults or the total number of people, e.g. “468” $\times 5 \div 2 (= 1170)$ or “468” $\times 7 \div 2 (= 1638)$
			A1	for 1170 or 1638
			P1	for process to work out the percentage of theatre full, e.g. $\frac{"468"+"1170"}{2600} \times 100 (= 63)$ or for a process to work out 60% of 2600 ($= 1560$)
			C1	for a correct conclusion supported by correct figures e.g. 63% or 1560 and 1638
				OR
			P1	for a process to work out 60% of 2600, eg. $\frac{60}{100} \times 2600 (= 1560)$
			P1	(dep P1) for process to work out this total number of children, e.g. “1560” $\times 2 \div 7 (= 445(.7\dots))$
			A1	for 445(.7...)
			P1	for process to work out children in the circle, eg. “445(.7...)” $\div 4 (= 111 \text{ to } 112)$
			C1	for a correct conclusion supported by correct figures e.g. 111 to 112 [Where appropriate accept rounded or truncated values]

Paper: 1MA1/2H				
Question	Working	Answer	Mark	Notes
2 cont.				OR P1 for a process to find the maximum number of children, eg. $2600 \times 2 \div 7 (= 742(.8\dots))$ P1 for process to work out the total number of children, e.g. $117 \times 4 (= 468)$ A1 for 468 and 742(.8...) P1 for $\frac{"468"}{"742(.8..)} \times 100 (= 63)$ or process to work out 60% of “742(.8...)” ($= 445(.7\dots)$) C1 for a correct conclusion supported by correct figures e.g. 63% or 468 and 445(.7...) [Where appropriate accept rounded or truncated values]
