

Question	Answer	Mark	Mark scheme	Additional guidance
22		$y = 3x - 6$	M1 for a correct method to find the gradient of the line, or $m = 3$ OR identifies -6 as the intercept in words or in a partial equation OR $y - b = m(x - a)$ where $m \neq 3$ and (a, b) is a correct coordinate M1 for $y = 3x + c$ or (L=) $3x - 6$ or $y = "3"x - 6$ OR $y - y_1 = 3(x - x_1)$ or $y - b = "3"(x - a)$ where (a, b) is a correct coordinate A1 accept $y = 3x + -6$ oe	Just ringing -6 is insufficient Award of this mark implies the first M1 c must be seen either as a letter or a number
