Question	Answer	Mark	Mark scheme	Additional guidance
13	739	P1	process to find the volume of C, eg $\pi \times 3^2 \times 25$ (= 706.8583471 or 225π)	For use of 3.14 Volume of C is 706.5
		P1	process to find the volume of A **or** the volume of B, eg "706.8..." $\times \frac{2}{2+13}$ (= 94.24777961 or 30π) or "706.8…" $\times \frac{13}{2+13}$ (= 612.6105675 or 195π) **or** process to work with density and ratio, eg $(2 \times 1.21 + 13 \times 1.02)$ (= 15.68)	Volume of A is 94.2 Volume of B is 612.3
		P1	process to find the mass of C, eg "30π" × 1.21 (= 114.0398133) + "195π" × 1.02 (= 624.8627788) **or** "225π" × "15.68" ÷ (2+13)	Mass of A is 113.982 Mass of B is 624.546
		A1	for an answer in the range 738.5 to 739	Do not award accuracy mark if the figure is from obvious incorrect working
