20 The diagram shows a square *ABDE* and an equilateral triangle *BCD*.

Work out the size of angle *EBC*.

Angle EBD = 90° ÷ 2 = 45° (square diagonal)

Angle DBC = 60° (equilateral triangle)

Angle EBC = 45° + 60° = 105°

1 mark
Use the angle properties.

1 mark
105°.

105 °

(Total for Question 20 is 2 marks)
