Question	Working	Answer	Mark	Notes
14		$y = \frac{x(k+1)}{k-1}$	M1	$y + x = k(y - x)$ **or** $\frac{y+x}{y-x} = k$ oe
	$ky - y = x + kx$ $y(k-1) = x(1+k)$		M1	For isolating x and y on opposite sides eg $ky - y = x + kx$
			A1	Completing correct algebraic reasoning to reach conclusion
