Question	Working	Answer	Mark	Notes
19		$y = 2x + 36$	P1	starts process, eg by rearranging to find gradient, eg $y = 6 - \frac{x}{2}$ **or** $\frac{-1}{2}$ **or** positions of B and E
			P1	complete process to find position of A **or** uses $\frac{-1}{m}$ to find the gradient of **M**
			P1	complete process to find equation of **M**
			A1	$y = 2x + 36$ oe
