

Question	Answer	Mark	Mark scheme	Additional guidance
12	6.4	P1	for a suitable start to the process, eg, $M = \left(\frac{7-3}{2}, \frac{13+21}{2} \right)$ (= (2, 17)) or $N = \left(\frac{15-3}{2}, \frac{23+21}{2} \right)$ (= (6, 22))	Condone missing brackets on coordinates Ignore units throughout
		P1	(dep on P1) for a correct first step using of Pythagoras, eg $(x_N - x_M)^2 + (y_N - y_M)^2$ eg (“6” – “2”)² + (“22” – “17”)² (= 41)	
		A1	for answer in the range 6.4 to 6.41	If an answer is given in the range in working and then rounded incorrectly award full marks.
