

Question	Answer	Mark	Mark scheme	Additional guidance
16	56.0	P1	for $\frac{BD}{\sin(112)} = \frac{7.9}{\sin(42)}$	
		P1	for complete process to find BD , eg $(BD =) \frac{7.9}{\sin(42)} \times \sin(112)$ (= 10.9...)	Values may be rounded or truncated.
		P1	for area = $\frac{1}{2} \times [BD] \times 15.3 \times \sin(42)$	$[BD]$ must be clearly identified
		A1	for answer in the range 56.0 to 56.1 SCB2 for $BD = 10.9...$ if no marks are awarded.	If an answer is given in the range in working and then rounded incorrectly award full marks.
