**12** The graph gives information about the volume, $v$ litres, of petrol in the tank of Jim's car after it has travelled a distance of $d$ kilometres.

(a) Find the gradient of the graph.

Gradient = (0 – 27)/(300 – 0)

= –27/300 = –0.09 litres per kilometre.

**2 marks total**
Change in volume / distance
–0.09 L/km
**(2)**

(b) Interpret what the gradient of the graph represents.

The tank loses 0.09 litre of petrol per kilometre travelled.

**1 mark**
Fuel used per km
**(1)**

**(Total for Question 12 is 3 marks)**
